DataCall

Powerful business reporting for Deltek® Costpoint® and GCS Premier®

DataCall provides the right data, to the right person, at the right time. There is no better recipe for success.

DataCall harnesses the power of IBM's Cognos BI to guide your company so that you can better understand and manage all levels of financial and employee performance.

DataCall's web-enabled software works in conjunction with Deltek's account and timekeeping solutions to provide customizable reports in real time, enabling employees to do their jobs faster and smarter.

Real-time Data on Financial Performance

DataCall© provides self-service access to real-time financial, employee, and project data linked directly to your Deltek solution. Customizable dashboards are available to users throughout the organization and across multiple functional areas. DataCall's reports can be generated either online or in an external format such as PDF and Excel.

Powerful Drill-Through Reports

DataCall allows users to slice and dice, re-organize, and restructure data in a fraction of the time normally required with traditional financial reporting tools. DataCall provides the flexibility to move seamlessly from a set of high-level summarized reports to the lowest level of detail available – all with a single mouse click. With over 120 pre-delivered reports and a nearly infinite number of customizable combinations, DataCall's drill-through capability provides simplified navigation to the exact report detail needed.

Hierarchical Control and Security Framework

DataCall delivers a control and security framework that is ready for implementation right out of the box. Security and access controls can be provided at the most granular level (employee, project, etc.) and the program is easily customizable to suit both your company's current and future organizational structures.

Cognos BI Foundation

DataCall uses IBM® Cognos® Business Intelligence (BI) as its reporting foundation, leveraging Cognos' strengths in database management and security infrastructure maintenance. DataCall empowers Cognos BI with additional tables, views, and performance enhancements, thereby allowing DataCall to become the core enterprise reporting tool for your Deltek solutions. Using Cognos BI, DataCall provides the filters necessary to allow users to group and sort information, use pick-lists and prompts, query the database, and produce reports in a variety of formats.

Easy to Implement and Modify

DataCall makes it easy for companies to design customized organizational structures. Effortlessly map existing employees, projects, and tasks into new organizational structures in mere hours. Install and customize report views and dashboards with minimal effort, in a fraction of the time and at a fraction of the cost required by other reporting tools. DataCall can quickly reorganize your business, saving your company days or even weeks worth of work.

Productivity and Results

DataCall puts financial and employee data at the fingertips of employees across your organization, reducing the resources required to support corporate financial management. Implementing DataCall will help your company save money, eliminate cost over-runs, improve project margins, and establish a robust management and communications process. DataCall delivers a higher return on investment for your Deltek solutions.

The Preferred Solution for Mission Success™

Sample DataCall Dashboard

"DataCall's comprehensive reporting solution allows us to perform detailed analysis on the financial health of our company through an easily navigated interface. We are able to make educated decisions through increased financial visibility where prior to implementing the solution, our visibility was limited."

- Paul V. Lombardi, President & CEO, TeraThink Corporation

"DataCall's many and varied reports are concise and address all areas of Accounting as well as project management. The drill down feature is outstanding and provides detail that often allows for question resolution without ever referring to physical documents."

- Kathie Borso, Altarum Institute

"What would take hours of research in Costpoint, I can answer in seconds with DataCall!"

- Jane Usavage Johnson, Controller, Sotera Defense Solutions

"DataCall has allowed us to produce a more empowered organization. We finally have the metrics to provide measurements to the leaders that need it in real time."

- Doug Duenkel, COO, Knight Point Systems

"As an executive focused on my company's success, DataCall is my most powerful tool. I literally use it all day long for as many types of inquiries as you can imagine asking."

- Chris Brandell, COO, Trowbridge & Trowbridge
