

Financial Consulting Services

*Don't sweat the details –
let PSS GovCon manage your back office needs*

Teaming with PSS allows our clients to focus on what is really important – mission success and growing their business.

PSS has more than 15 years of experience providing financial consulting, Deltek system implementations, reporting tools, and back office services for government contractors of all sizes.

Full-Cycle Accounting and Controller Services

PSS helps government contractors maximize return on investment in their back office by offering a full complement of managed back office services, including budgeting, DCAA audit compliance, accounting, financial analysis, contracts management, rates and pricing, payroll, and labor management services. Teaming with PSS creates a competitive advantage by enabling a scalable back office to meet your company's dynamic needs, lowering fixed and overhead costs, and ensuring compliance with standard government practices.

Deltek® Solutions Implementation and Hosting

PSS implements Deltek government accounting solutions – GCS Premier®, Time and Expense, IBM® Cognos® Business Intelligence, and Costpoint® – as a Deltek Premier Partner. PSS expertly optimizes these solutions to meet each client's unique needs and operating environment. In addition, PSS offers the option of hosting Deltek solutions in a state-of-the-art cloud infrastructure, which provides for disaster recovery, multi-site backup and restore, and government-certified secure access.

Costpoint® 7.0 Migration Support

PSS uses a proven methodology to successfully migrate its clients to Costpoint 7. Our knowledgeable and experienced personnel execute detailed test scripts tailored to each module and ensure that all security features are properly implemented. We take the time to train client staff on all enhancements to maximize the benefits of migrating to Costpoint 7.

DataCall® Project Reporting

PSS puts critical project financial information where it matters most – in the hands of managers at all levels of the organization. DataCall is a customizable, secure financial and accounting business intelligence software tool that works in conjunction with Deltek accounting solutions to provide real time and on-demand access to critical business information. With intuitive dashboards and over 120 report options, PSS' DataCall reporting solution helps clients achieve profitability – one project at a time.

Advisory Services

PSS provides a broad array of consulting services for government contractors ranging from planning, budgeting, internal processes and controls, pricing, rate structures and pools, to DCAA cost submissions and audit advice, to acquisition integration and due diligence support. PSS provides its clients with easy, on-demand access to cost-effective, industry leading expertise.

The Preferred Solution for Mission Success™

With a combination of expertise in government contracting, state-of-the-art information technologies, financial management, and accounting systems, PSS GovCon is the ideal partner to support your financial systems and back office needs.

GOVCON CUSTOMERS

"I can call them anytime, 24/7, and get the response I need."

– Cheramy White
Vice-President, Controller
SERCO

"PSS delivered a comprehensive financial consulting solution on a mission-critical project. In less than three months, they restructured, modernized and merged two disparate systems, enabling us to go live on day one of our fiscal year. PSS' services were on-schedule and under-budget, and they were a partner throughout the entire process. I continue to be impressed by PSS' customer service and responsiveness today, almost a year after implementation."

– Rich Sawchak
Chief Financial Officer
Novetta Solutions

On average, PSS GovCon customers see a savings of up to 40% by outsourcing back office functions.
